## Technology Seminar

Mitel City Offices, Bishopsgate, London  
26<sup>th</sup> January 2012, 09:30 - 14:30

# Flexible Working

Converged systems for a mobile workforce

The imminence of the Olympic Games in London is bringing to the forefront of all our minds the inevitable challenges of transport and what alternatives can be put in place to mitigate any disruption.

Britannic Technologies have been delivering flexible working solutions to clients for a number of years, but as technologies change the solutions become simpler, more secure and more cost effective to implement.

## Agenda

The agenda for the day incorporates a range of topical areas concerning the latest in flexible and remote working.

- 09:30** Registration & coffee
- 10:00** Welcome & introduction
- 10:15** Mitel's research into Flexible Working
- 10:45** Red Box Recorders- Call recording on mobiles
- 11:15** Coffee
- 11:30** Mitel Video Solution
- 12:00** Planning and Implementation - Jonathan Sharp, Britannic Technologies
- 12:30** Product demonstrations
- 13:00** Lunch & networking
- 14:30** Close

## Who should attend?

Business leaders, IT Directors and Managers will be interested to hear the latest research on flexible working and how call recording can be incorporated into a flexible working environment.

### You should attend if you would like to...

- Understand the benefits of mobile call recording
- Hear about Mitel's latest research into flexible working
- Learn how a single supplier can provide convergence across your entire network
- Simplify IT management across the entire estate
- Review affordable video conferencing
- Help support your business continuity plans
